### Investment Objectives and Strategies

This fund's objective is to provide a fixed monthly distribution by investing primarily in Canadian and foreign fixed-income and equity securities, income trust securities, as well as mutual fund securities.

The portfolio manager will invest in Canadian equities, including income trusts, and fixed-income securities issued by the federal government, provincial governments, government agencies and corporations.

A portion of up to 60% of the purchase cost of the fund's assets may be invested in securities of other mutual funds, which may include mutual funds that are managed by BMO Investments Inc. or one of its affiliates. The fund's underlying mutual funds selected by the portfolio manager will invest primarily in global securities, including high yield fixed income securities from issuers around the world with a credit rating below BBB, as well as Canadian income trust securities, such as royalty trust units (RTUs), real estate investment trusts (REITs), and business trusts (BTs), representing various sectors of the economy.
